Serenity Program

the Choice of Satisfaction

Serenity Program: The Choice of Satisfaction

More than 40 years of acquired research and dedicated experience enables **Laboratoires Arion** to confidently offer our line of unique products to ensure a consistently successful and satisfying procedure.

Extensive research and development has resulted in innovative surgical products meeting the highest of expectations.

Sensitive to many concerns surrounding breast augmentation surgery, **Laboratoires Arion** proposes the **Serenity Program** - a real guarantee of satisfaction for your patients.

The Serenity Program

Monobloc® Silicone SoftOne® + Sizer Hydrogel-CMC Breast Implant

Program advantage:

- Assurance of the best possible aesthetic choice and the greatest patient's satisfaction.
- Automatic and complimentary patient's registration for the **Serenity Follow-up Program**.

The patient's satisfaction can be measured by aesthetic and medical results: the **Serenity Program** can guarantee the highest standards to ensure and achieve this result.

Description of the Serenity pack

The **Serenity pack** is composed of one pair of **Monobloc® Silicone SoftOne®** breast implants and of one corresponding **Monobloc® Sizer Hydrogel-CMC**.

The price of this pack is equal to the usual price raised of 150 Euro.

To know more

Connect on www.laboratoires-arion.fr ; find the complete **Serenity follow up Program** on line, the patient's registration forms to the **Serenity Program** and many practical information concerning breast augmentation surgery. Operational procedure & Conditions

the Choice of Serenity

Serenity Program participation conditions

You will, at no cost, automatically be enrolled to the **Serenity Program** from November 2006, once the patient has confirmed their participation. Receiving the SoftOne breast implant alone does not constitute enrolment.

Only first time receivers of breast implants will qualify for the **Serenity Program** and not those who are replacing their current implants.

It is imperative the surgical procedure be performed by a recognized plastics or cosmetic surgical specialist and in compliance with the specific directions for use with **Laboratoires Arion** products in the **Serenity Pack**.

Operational Procedure of the Serenity Program

After the procedure, the surgeon must submit to the patient the serial numbers of the implants and the sizer in addition to protocol papers, which must be duly completed and sent back to **Laboratoires Arion** to confirm registration to the program. Enrolment may also be completed on the **Laboratoires Arion** website. The patient will then receive confirmation of their participation to the **Serenity Program**.

Throughout the duration of the program, it is imperative that the patient retain these documents in order to participate to and benefit from the program.

Details of the Serenity Program

Laboratoires Arion will offer the patients an additional guarantee of satisfaction with a comprehensive follow up to the **Serenity Program**.

In the 5 years following the procedure, in the case of:

- Loss of integrity of the envelope, causing a rupture which needs to be surgically replaced.
- Capsular Contracture.

Laboratoires Arion will commit to replacement of the affected implant at no cost in addition to offering a **1000 €** remuneration to be directed with priority to anaesthesia and operating room costs.

In the
5 to 10 years

- Loss of integrity of the envelope.

Conditions of realization of the Serenity Program

Serenity after care comfort Program

Conditions of the Serenity Program

The replacement of the implants and the financial involvement of **Laboratoires Arion** will not be considered under the following situations:

- Reconstructive surgery.
- Unsatisfied with size or the aesthetic results.
- Rupture resulting from the surgical implantation.
- Loss of integrity of the implant due to a revised cosmetic surgery.
- Loss of integrity of the implant due to capsulotomy (open or closed).
- Replacement of an intact implant on the opposite breast.
- Deformity of the implant or fracture of the gel.
- Competing products to implants from **Laboratoires Arion**.
- Products from **Laboratoires Arion** used outside of a **Serenity Pack**.

In the parameters of the conditions met and the participation to the program, an exchange will only be done with an identical implant. It will not be exchanged with implants of a higher or lower volume.

The exchange of the implant and financial participation due to a qualified revision will only be available once.

To receive validation from Arion Laboratory to qualify for the benefits from the **Serenity Program**, it is imperative that it be controlled by the technical services of **Laboratoires Arion** or an expert mandated by **Laboratoires Arion**.

Within the 5 to 10 years following the procedure, in the case of:

- Loss of the integrity of the envelope.

Laboratoires Arion will replace the altered implant at no cost.

Over 10 years of the surgical procedure, in order to provide the patient with a very reliable product, **Laboratoires Arion** will apply a **preferred lifetime rate** to a second implant while providing one free of charge in the event of need for exchange. A copy of the patient card showing the date of the original procedure as well as the serial number of the original implants must be provided.
